

IDAHO

Despite enactment of the Health Insurance Portability and Accountability Act of 1996 (HIPAA, P.L. 104-191), individuals with preexisting conditions continue to face challenges accessing affordable and adequate health insurance. HIPAA sets minimum standards of protection to improve access to health insurance for millions of Americans obtaining coverage through group insurance. HIPAA also imposes some limits on the time that preexisting conditions may be excluded from coverage and guarantees access to coverage for certain individuals who lose group coverage. However, HIPAA does not address the private individual insurance market. Despite its strengths, HIPAA has many gaps that have been exposed over the decade since its enactment, including insufficient protection of individuals with chronic illnesses. Below is a snapshot of chronic illness and the uninsured population in your state.

DEMOGRAPHICS

	Idaho	United States
• Population	1,407,700	292,947,440
• Non-Elderly Adults who are Uninsured	17% (216,850)	18% (46,118,230)
• Children who are Uninsured	11% (45,120)	12% (9,035,420)
• Total Enrollment of Medicaid Population ¹	12% (168,600)	13% (37,868,010)
• Individuals with a Life-Threatening, Chronic or Debilitating Illness ²	32% (450,464)	32% (93,743,181)
• Individuals in the Private Market (non-group) ³	8% (107,430)	5% (14,162,970)

STATE HIGH RISK POOL

In 2001, Idaho established a high-risk pool entitled the Idaho Individual High-Risk Reinsurance Pool. State high-risk pools are nonprofit associations created by individual states to provide health insurance to people who are unable to acquire health insurance on their own, usually due to preexisting health conditions. This health insurance comes in the form of state-subsidized coverage, with the premium rates in Idaho capped between 125 to 150 percent of the average, standard market rate. Currently, 33 states have high-risk pools and together they extend coverage to 184,000 individuals. However, unlike most state high-risk pools, Idaho requires all private, individual health insurance carriers to offer the Individual High-Risk Reinsurance Pool plans as well.⁴ More than 1,462 residents of Idaho are enrolled.⁵

HEALTH INSURANCE PORTABILITY ASSURANCE INITIATIVE

The goal of the National Patient Advocate Foundation (NPAF) Health Insurance Portability Assurance Initiative is to ensure access to affordable and adequate health insurance for all individuals, particularly those who have become uninsurable due to a preexisting condition or a family history of chronic, debilitating, or life-threatening conditions. NPAF stands ready to work with federal, state, and local policymakers and other stakeholders on this important policy initiative. For more information contact Amy Boivin at amyb@npaf.org

National Patient Advocate Foundation (NPAF) is a national, non-profit organization that is dedicated to the mission of creating avenues of patient access through improved access to, and reimbursement for, evolving therapies, therapeutic agents, and devices through policy and legislative reform at the state and federal levels. Our mission is shaped by the experiences of the patients served through our companion organization, Patient Advocate Foundation.
